

CORPORATE AMUSEMENT SERVICES

Health and Safety Procedures with Respect to Delivery, Installation and Removals

1. Prior to delivery all machines are to be functionally tested and checked for current Pat Certification.
2. Read Risk Assessment Criteria and check that full Public Liability Insurance is current where applicable.
3. A full brief should be obtained with reference to site access and an assessment made as to how many staff are required and whether any special equipment (ramps or stair walker) is necessary.
4. Once on site, report to site contact for any brief and check their site safety procedures. Make sure, area is clear and safe for delivery.
5. Once equipment is installed, visually check and functionally test the games. Brief client on game operation and what to do in the event of a fault. Obtain signature on Installation documentation
