Generic Risk Assessment: Installations of Arcade Games (Two Person to Carry in)

SIGNIFICANT HAZARDS		Who Might be Harmed & How?	Control Measures	Risk with Controls in Place	Further Actions Needed	Action Completed*	Actioned By:
1.	Fire	Installers and others in the vicinity. Burns, smoke inhalation, fatality	The hirer has a responsibility to ensure there is a fire risk assessment for the venue and provide appropriate firefighting precautions and equipment. Firefighting precautions for the venue should include extinguishers for electrical fires. Powder fire extinguishers are carried on vehicles. Vents on machines should not be obstructed. Electrical appliances (games and booths) are tested before they leave the depot). We will not obstruct any escape routes and safety equipment (isolation switches, gas cut off, alarms, extinguishers etc.) with the installation.	Low Ignition and fuel sources are limited.	Installers to make themselves familiar with emergency procedures and location of fire extinguishers on arrival at site. Fire extinguishers should only be used if there is no risk to safety and user has been trained in use of extinguisher.		
2.	Manual Handling of games and tables when offloading and loading. Possible crush injuries when winding down feet and placing games on	Employees (Installers). Injuries to back and limbs (Strains/Sprains/ Abrasions/Bruises, Crush Injuries)	Based on the access details provided by the hirer (information regarding the physical and environmental conditions -stairs, lifts, floor and ground surfaces etc.), when ordering the games, two installers are needed to transport the game(s) from the vehicle to the point of use. Once on site, the installer will report to the hirer or representative and check the route to confirm the task, taking into account the individual / load factors and confirm the access and environmental factors prior to installation. Games are on castors and are delivered to site on vehicles with tail lifts. Ramps are used where necessary. Mechanical aids can be provided and used at all time e.g. sack trollies, dollies. All installers have been trained in manual handling.	Low if controls are met.	Monitor and provide refresher training as necessary. Installers to report any symptoms or injuries to management.

	wooden blocks.		Once installed, no attempt should be made to move the game by an unauthorised person. Installers wear gloves & safety footwear. All lifting equipment is inspected annually by a competent person.				
3.	Use of Electrical Equipment Connecting cables and power supply when installing equipment	Installers. Possible risk of electrocution/ electric shock/burns.	All games undergo planned maintenance and PAT testing in line with manufacturers' instructions. All games are installed by trained fitters and are tested and visually inspected for damage to cables and connectors prior to leaving the depot and on installation. No unauthorised person should tamper with the game or try to access the internal workings. If there is a fault, the hirer should contact the installer. Electrical hazard signs are posted where an electrical hazard exists. As far as possible, the location should be dry. RCDs will be used for installations in marquees and other external venues. The hirer should supply a standard 240V power supply to within 2 meters of the intended installation point. Powder fire extinguishers are carried on vehicles. Firefighting precautions for the venue should include extinguishers for electrical fires.

Generic Risk Assessment: Installations of Arcade Games (Two Person to Carry in)

SIGNIFICANT HAZARDS		Who Might be Harmed & How?	Control Measures	Risk with Controls in Place	Further Actions Needed	Action Completed*	Actioned By:
4.	Slips, Trips and Falls	Installers Sprains or fractures if they trip over cables or slip.	Installers are instructed to maintain good housekeeping. They walk around the site prior to offloading to observe any potential hazards. All cables are kept tidy and installers maintain a safe route to work areas. Cables to be used where they are not a trip hazard, e.g. not across access routes etc. Trailing cables are taped down or cover with cable protector. Safety footwear is worn. Cones are used when vehicle tail lift is operational to keep members of the public away from hazards.	Medium	Monitor housekeeping and be observant.		
5.	Vehicle Movement on Site	Installers and others. Injuries from collisions of vehicles with vehicles and vehicles and pedestrians.	Installers observe site speed limits and one-way systems. High visibility clothing is worn. Barriers should be used to segregate pedestrians and vehicles. Driver's to be observant for unexpected movements of pedestrians. Drivers to follow specified route. Vehicles should be fitted with a reversing alarm. A banksman must always be present. Employees are instructed to report any observed unsafe behaviour.	Low			
6.	Personal injury from sharp edges, nips, strobe lighting,	Installers Cuts and bruises.	A physical inspection of the game is carried out prior to dispatch in the workshop and after installation. Damaged equipment will not be sent out. Gloves to be worn when handling abrasive edges. These must give protection against abrasive	Low
